Network Hospital Claim Audits

Specialty of ATCS Claim Intelligence in conducting Network Hospital Claim Audits, focusing on ensuring the accuracy and compliance of claims from network hospitals while addressing discrepancies and fraud effectively.

Ascept	Details To review and verify the accuracy and appropri- ateness	Frequency	Conducted - based on specific triggers such as anomalies in claims or high-risk hospitals.
Purpose	of claims submitted by network hospi- tals, ensuring compliance with insurance policy terms, network agreements, and regulatory standards.		- Part of routine audit and compliance checks.
Scope	- Examination of claims from hospitals within the insurance company’s network.	Outcome	- Accurate identification of billing errors and discrepancies in network hospital claims.
	- Review of medical records, billing statements, and payment records associated with these claims.		- Verification of compliance with insurance policies and network agreements.
	- Verification of adherence to network agree- ments and insurance policy terms.		-Detection and investigation of potential fraud.
Key Activities	Data Collection: Retrieve claims data from network hospitals, including medical records, bills, and policy documents.		- Recommendations for improving claim processing and network hospital billing practices.
	Claim Review: Assess the accuracy of billed services, coding, and pricing against the medical records and network agreements.		- Implementation of corrective actions and follow-up reports.
	Policy Compliance Check: Ensure that the claims adhere to the terms and conditions specified in the insurance policy and network agreements.	Regulations G Standards	-Insurance policy guidelines.
	Discrepancy Analysis: Investigate and document any discrepancies or errors found during the review.		-Network hospital agreements.
	Fraud Detection: Identify any anomalies or patterns that might indicate fraudulent activity.		-Healthcare billing and coding regulations.
	Reporting: Generate detailed audit reports outlining findings, discrepancies, and recommendations.		-National and local healthcare laws.
	Corrective Actions: Develop and implement action plans to address identified issues.		-Standards for fraud detection and claim processing.
	Follow-up: Implement corrective actions and monitor resolution of identified issues.	Reporting	- Comprehensive audit reports detailing findings, discrepancies, and recommendations.
			- Summary of compliance issues and corrective actions.
			- Documentation of potential fraud cases.
			- Follow-up reports on the resolution of issues and implementation of recommendations.
